1. The amendment filed January 21, 2009 has been entered.

Conclusion

2. A declaration is an application paper, 37 CFR 1.52(b). 37 CFR 1.52(a)(1)(iv) requires all application papers to be legibly written either by a typewriter or machine printer. The reasons the Office amended 37 CFR 1.52(a) to include this requirement are directly applicable to the identification required by 37 CFR 1.63(a)(2) and 37 CFR 1.63(a)(3). The Office seeks sufficient clarity and contrast between the paper and the writing thereon to permit electronic reproduction by use of digital imaging and optical character recognition. Applications containing hand-written papers create an inordinate administrative burden on the Office during the initial processing, examination, and publishing of the application as a patent. Therefore, the Office no longer permits applicants to submit application papers that do not meet the standards set forth in the rules. See 61 Federal Register 161 of 19 August 1996, page 42793.
3. The opportunity to date and initial alterations afforded by 37 CFR 1.52(c)(1) does not override the requirement for the use of a typewriter or machine printer of 37 CFR 1.52(a)(1)(iv).¹ The argument that the handwriting on any document submitted in this application is permitted is not warranted on the evidence that the revision in 1996 to 37 CFR 1.52 exchanged “must be legibly written, typed, or printed in permanent ink or its equivalent in quality” for “must be legibly written by typewriter or mechanical printer in permanent dark ink or its equivalent...” and that the equivalence intended was to permit the filing of papers printed by any computer operated printer, such as a laser printer which uses toner rather than ink, and to avoid a conflict between 1.52(a) and

Patent Cooperation Treaty (PCT) Rule 11.9². See the Federal Register notice identified in the previous paragraph.

4. To the extent that twelve years after the rules changed (to deny the ability to write application papers) and the procedures of the firm became obsolete, applicant's representative would rather argue than comply with the relevant rule set forth explicitly in the objection, the Examiner makes no further requirement.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Constantine Hannaher whose telephone number is (571) 272-2437. The examiner can normally be reached on Monday-Friday with flexible hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David P. Porta can be reached on (571) 272-2444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

² Indeed, 37 CFR 1.52(c)(1) ends with the requirement for a substitute specification if the application papers after any interlineation, erasure, cancellation, or other alteration "do not comply with paragraphs (a) and (b) of this section."

² PCT Rule 11.9(a) then required and still requires that the “request, the description, the claims and the abstract shall be typed or printed” with only the exceptions listed in 11.9(b).
